Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10, 12, 23, 24, 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tano (US 4597719) in view of Patzke et al. (US 4023592).

Tano discloses a process for controlling spitting from a multistage pump having feed (17) and dispensation (19) chambers an outlet pipe (13) coupled to the dispensation chamber, the process comprising a first stage, wherein while a first valve is closed and a second valve closed, the pump chamber is brought to equilibrium, a second stage wherein a pump is activated to pump a fluid onto an object through the outlet pipe when the second valve is opened.

It is generally known in the art to provide a dispensing system with an outlet valve through which fluid is dispensed as is evidenced by Patzke. Patzke discloses a dispensing means comprising a pump, a dispensation chamber, a one way inlet valve and one way outlet valve, wherein the outlet valve is opened upon activating the dispensation stroke of the pump. It would have been obvious to one of ordinary skill in the art at the time the invention was made, in view of Patzke, to modify the device of Tano to include a one way outlet valve through which the fluid could be dispensed in order to provide a means for preventing suck back through the outlet pipe 13.

Art Unit: 3742

Claims 22, 30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tano.

Tano in view of Patzke disclose the claimed invention except the specific viscosity of the fluid to be pumped, it would be within the skill of the routineer to use such a process as described by Tano and Patzke for a fluid having the viscosity as claimed by applicant.

Allowable Subject Matter

Claims 14-21, 25-28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

Applicant's arguments with respect to claims 10 and 23 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the

Art Unit: 3742

advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
